PROFESSIONAL SUMMARY

Data science & AI practitioner with a hybrid data and computer-science background, focused on LLMs, agentic systems, LLMOps, and AgentOps (*precision, latency, token efficiency, security, scalability, and policy governance).* Experienced in end-to-end agentic and model development, fine-tuning, deployment and evaluation across self-hosted and AWS environments. Consistently engaged with the latest AI research and techniques. Mastering modern engineering tools and the latest vibe-coding workflows.

WORK EXPERIENCE

Data Scientist & AI Engineer (LLMs) **Nov. 2025 – Now**
PrediSurge *Saint-Etienne, France*

- Led the end-to-end architecture and implementation of an agentic RAG pipeline on structured clinical data and PDFs using fine-tuned SLMs, PydanticAI-based orchestration, AWS Bedrock, and LLMOps (prompt versioning, monitoring, RAGAS evaluation).
- Designed a scalable, secure, and low-latency integration architecture for the agentic RAG within the company's SaaS platform built on AWS microservices.

AI Engineer **Oct. 2023 – Sep. 2025**
APTIV *Vannes, France*

- Transformed optimally dataflow graphs to Logical Execution Time (LET) design for automobile projects using Constraint Programming (Z3), ensuring the reduction of LET design manual labor by almost **70**%.
- Fine-tuned the LLM model CodeT5 using PyTorch to translate text to a local automobile platform command language, and developed evaluation metrics & parsers needed, achieving an accuracy of **91**%.
- Developed Cloner tool for systematic duplication of AUTOSAR Classic elements using lxml Python library to reduce time-execution errors for a local SensorFusion project running on the target automobile platform.

ML Engineer Intern **May 2022 – Jul. 2022**
ETIS lab (CNRS UMR 8051) *Cergy, France*

- Applied the MPDist distance measure using the Stumpy library to construct distance matrices on linguistic burst time series data, achieving a DBCV clustering validation score of **0.73** using HDBSCAN.

Junior Data Scientist **Mar. 2017 – Sep. 2019**
PI Marketing *Tangier, Morocco*

- Deployed ML ensemble models for customer segmentation and predictive lead scoring to optimize marketing campaign performance and personalize outreach using Pandas, Scikit-learn, SQL & Tableau.

Android Developer **Feb. 2016 – Jan. 2017**
Smart Source *Tangier, Morocco*

- Developed an Android app enhancing operational efficiency for clients using Android Studio & Postman.

EDUCATION

Data ScienceTech Institute **Oct. 2023 – Dec. 2025**
Master in Data Science & Artificial Intelligence *Paris, France*
GPA : 4.0

Université Sorbonne Paris Nord **Sep. 2021 – Jul. 2023**
Bachelor in Computer Science *Villetaneuse, France*
GPA : 3.7

Seconda Università di Napoli **Sep. 2020 – Oct. 2023**
Bachelor in Statistics & Data Science *Caserta, Italy*
GPA : 3.7

PROJECTS

https://github.com/Jalanjii

CERTIFICATIONS

- AWS Certified Solutions Architect
- Deep Learning Specialization — DeepLearning.AI
- Neo4j Professional
- Discrete Optimization — Georgia Tech

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Cypher, C/C++
Data: Pandas, NumPy, PySpark, Scikit-Learn,
Fine-tuning & Distillation: PyTorch, UnslothAI, DistillKit
Agentic AI & RAG: LangGraph, LangChain, PydanticAI, vLLM, NiceGUI. DeepChat
LLMOps & AgentOps: LangWatch, LangSmith, DSPy, RAGAS, DeepTruth, Langfuse, Semantica
MLOps & DevOps: MLflow, DVC, Docker, GitHub CI/CD, FastAPI
Cloud: AWS (Bedrock, SageMaker, Athena, Lake Formation, S3, RDS, EC2, ECS, EKS)
IaC: Terraform
Databases: PostgreSQL, Neo4j
Tools: Git, VS Code, Claude Code, Kilo Code, Cursor, Codex, Gitnexus

INTERESTS & LANGUAGES

Languages: English (native), French (advanced), Arabic (native), Italian (beginner)
Interests: Blues & Bluegrass & Country Music, Philosophy Readings, Canoeing, Hiking, Mountain Biking
