PROFESSIONAL SUMMARY

Data science & AI practitioner with a hybrid data science and computer-science background, focused on LLMs, agentic systems, LLMOps and MLOps. Experienced in end-to-end agentic and model development, fine-tuning, deployment and evaluation across self-hosted and AWS environments, and consistently engaged with the latest AI research and techniques.

WORK EXPERIENCE

Data Scientist & AI Engineer (LLMs)

Nov. 2025 – Now

PrediSurge

Saint-Etienne, France

- Led the end-to-end architecture and implementation of an agentic RAG pipeline on structured clinical data and PDFs using fine-tuned SLMs, PydanticAI-based orchestration, AWS Bedrock, and LLMOps (prompt versioning, monitoring, RAGAS evaluation).
- Designed a scalable, secure, and low-latency integration architecture for the agentic RAG within the company's SaaS platform built on AWS microservices.

AI Engineer

Oct. 2023 – Sep. 2025

APTIV

Vannes, France

- Transformed optimally dataflow graphs to Logical Execution Time (LET) design for automobile projects using Constraint Programming (Z3), ensuring the reduction of LET design manual labor by almost **70%**.
- Fine-tuned the LLM model CodeT5 using PyTorch to translate text to a local automobile platform command language, and developed evaluation metrics & parsers needed, achieving an accuracy of **91%**.
- Developed Cloner tool for systematic duplication of AUTOSAR Classic elements using lxml Python library to reduce time-execution errors for a local SensorFusion project running on the target automobile platform.

ML Engineer Intern

May 2022 – Jul. 2022

ETIS lab (CNRS UMR 8051)

Cergy, France

- Applied the MPDist distance measure using the Stumpy library to construct distance matrices on linguistic burst time series data, achieving a DBCV clustering validation score of **0.73** using HDBSCAN.

Junior Data Scientist

Mar. 2017 – Sep. 2019

PI Marketing

Tangier, Morocco

- Deployed ML ensemble models for customer segmentation and predictive lead scoring to optimize marketing campaign performance and personalize outreach using Pandas, Scikit-learn, SQL & Tableau.

Android Developer

Feb. 2016 – Jan. 2017

Smart Source

Tangier, Morocco

- Developed an Android app enhancing operational efficiency for clients using Android Studio & Postman.
